

Records of Immigrant Insects for 1925

BY THE EDITOR

In this list, those marked with an asterisk were observed for the first time in 1925. The others of the list were known before, some of them having been previously recorded, but others are now recorded for the first time, or at least their full names being now used for the first time. Those with double asterisk were previously recorded, but now described for the first time.

<i>Trigoniulus lumbricinus</i> (Gerst.) (Myriap.).....	220
<i>Orphnaeus brevilabiatus</i> (Newp.) (Myriap.).....	221
<i>Desmometopa m-nigrum</i> (Zett.) (Diptera).....	224
<i>Chiromyia</i> (<i>Scyphella</i>) <i>flava</i> (Linn.) (Diptera).....	228
